

Let's Try First!

Use "Regulatory Sandbox"!

Please feel free to contact us first!

It is important to "Try First" for the social implementation of new technologies and business models.

What is "Regulatory Sandbox"?

- Just like a child playing freely in a **sandbox**, the Regulatory Sandbox framework promotes social implementation such as smooth commercialization and regulatory reform, by enabling you to **demonstrate cutting-edge technologies and business models** within a limited time period and area with a prior consent from participants, and to take advantage of the data and materials obtained from the demonstrations.
- The Cabinet Secretariat serves as a point of contact for applicants to find information and seek prior consultation.

Features

- The framework is open to any industry, including:
 - Mobility (e.g. e-scooters),
 - Fintech (e.g. blockchain and P2P insurance),
 - Healthcare (e.g. telemedicine, OTC vending machines, and mobile pharmacies).

E-scooter

Telemedicine

- You can have a prior consultation with the team to receive advices and hands-on guidance when you plan your project.

Performance

(As of October 2023)

30 plans

149 groups approved!

Some cases led to **Regulatory Reforms!**

※Road Traffic Act (E-scooter)

※Act on Strengthening Industrial Competitiveness (SMS)

Process under Regulatory Sandbox framework

STEP 1

Prior Consultation

STEP 2
